

Home of Happiness-Nepal

“It is our responsibility to protect the person right of women & children who are lying back due to the following mentioned reasons”

About Nepal

- The Democratic republic of Nepal is located between China and India. And is known to be one of the most beautiful places in the world. It's beautiful landscapes and high mountains are a great attraction for tourists from all around the world.
- The Nepali society very diverse It consists of many ethnic groups, religions and languages. All of which creates a complex fabric of beliefs and traditions.
- Nepal consists of 56,827sq mile or 1,47,151sq km of land area.
- The Population in Nepal is 23 million people, and is continually growing in a rate of 2.45% per year. Although 1.5 million people live in the Kathmandu area, only half of them live in Kathmandu, and 85% of all the population lives in the country side.
- Being a 3rd world country, and having most of the population living in rural areas creates many difficulties. Poverty and sickness due to lack of proper health care are just a few of the reasons why many people are forced to live in the streets, not being able to support themselves. Education is not common in the country side and many children do not get the opportunity to get good or any education.
- Inevitably children are the ones to suffer more then any other group.

Children in Nepal

- In order to better understand the difficulties children in Nepal are facing, hereby are several facts:
- 40% of all children are from poor families
- 47% of all children are suffering from malnutrition.
- 81% of all children are living in rural areas.

Many children are being denied of their childhood. Having to face reality in a very young age. Not having a place to live, a family or food. They are forced to grow up and survive.

We would like to help them. Not only to have better education, but to have a better future. And a fair chance to succeed.

.

The solution

We would like to help the children of Nepal. Giving a chance to the children who need it the most. The ones that would not be able to do it without help. Building their future, and ours.

How?

- By supplying them with proper housing, health care, education and love.

Who?

Our target population:

- Orphans.
- Children of single women.
- Children of family with many children.

The vision

1. Our main objective is to **provide a home**. A safe refuge, provide protraction, housing, good nutrition, health care and mainly love and care. We believe that a good foundation is the key to a better future.
2. **Education- building a future**. Quality education is the means by which we would like to help our children to build their future. The opportunity to be educated is invaluable and will open endless different doors and opportunities for them. Thus giving them a better future.
3. **Skill opportunities**. Education is extremely important, but when it is combined with a useful skill. We provide our children with job training, this allows us to enable them to support themselves and their future family. And hopefully preventing them from being in an underprivileged position again.

Making the dream a reality

In order to make our vision a reality, we have divided our plan to 4 main steps

1. **founding.** for Housing, education, health care, and creating a happy environment.
2. **location.** Finding a location that will provide our needs. A home in a good environment, a good school ext.
3. **staffing.** Finding the right people is a must. People who share the passion for helping children and believe in creating a better future for them.
4. **recruiting.** Finding children in need and incorporate them in the project.

Home of Happiness

- “Home of Happiness” was formed by Mr. Deepak Bishowkarma, in 2008.
- It is located in “Nayagaun”, Pokhara.
- Currently it is the home of 4 children, ages 6 to 15.
- We have 3 staff members.
- Education: the children are attending a private school (LA school) in Pokhara.

Future plans

FUTURE PLANS:-

To provide help for very poor, socially oppressed and orphan in education and other activities in order to make them self-reliant.

To give vocational and other training to the grow up children.

If we receive sufficient fund. It will be keep more children and it will be better to provide job skill training.

We would like to build own building, own school from Nursery to grade five (in the first phase) within bound of home itself.

A computer for office use to keep children data, communication and their office related work.
Own bus transportation.

We are planning to provide help to all those children who will be in search of their live hood in the street of cities and who are socially boy cotter, abandoned by their parents, lost their parents and have no alternative of living.

We need your help for

Housing, education,
